Idjet Id Card Software 77

For ID card production, card designer are now using a card design workbench to create, modify, and add design elements to templates. With CardStudio 2.0 you can import either an original or a template of your choice, personalize it by changing colors, fonts, images, and text. Then, edit these elements directly on your own card. Sorted by publication date, your Card Studio library helps you organize your templates and worksheets into convenient collections. Or, even print them out at the press of a button to modify when you're ready. For even greater creativity, CardStudio 2.0 allows you to use existing data to create your own data or calculate a value. With the easily customizable Form, Data Calculator, and Notebook, you're able to create your own formulas to calculate various important factors. Get started by entering data into the pre-defined fields. Then, type your own calculation into the formula bar, and instantly get the answers you need. Design Elements. Create your own graphical design elements and share them with others. With any of the dozens of user-selectable styles, you're able to add detailed borders, shading, and color variations with the least number of clicks. From text to graphical, you can easily apply a design element or text field to your card or template. Getting started is easy with CardStudio. Simply create your own worksheet for your card and add your own data elements. Then, create a digital ID through your custom designs and send it off to print! CardStudio 2.0 Make it easy to design and produce Digital IDs with exceptional quality in seconds. Track your ID cards in real-time and print your cards to your desired templates. CardStudio 2.0 is an elegant way to produce personalized plastic ID cards with breathtaking designs and quality.
