**Mass Effect 3 Mods Miranda !!BETTER!!**

---

there are two main ways to make money in mass effect 2. the first is to work as a mercenary. the way you make money in this is to kill the aliens who are attacking the planet or making forts on your homeworld. the second is to complete side missions that are scattered throughout the galaxy. each time you complete one of these missions, you're rewarded with credits. the problem with this is that some side missions can get rather tedious. luckily, this mod `nexus.mod.tools` lets you skip those tedious missions with ease. this mod is a great addition for players looking to make a quick buck. you can make a ton of money in a short amount of time, but you'll have to avoid the faction missions. mass effect 2 has a variety of achievements to

---

unlock. most are pretty easy to get, but a few can be quite tricky. this nexus.mod.tools mod makes those achievements easier to get. all you have to do is get a certain number of kills for the achievement, but this mod will reduce the amount of times you have to do so. this is a great mod for those of you looking to complete more achievements in a shorter amount of time. earlier in the week we shared a mod that can turn off shiny objects in the game. however, being a mass effect mod, the mod is more than just a little bit of fun. the mod also has a companion who helps in the companion search by providing a map of the galaxy and other bonuses. the companion is named "cerberus chief of staff." the mass effect mod scene has been pretty active

---

lately. recently, there has been a complete overhaul of the game. sadly, it's not for the original release, but rather the mass effect 2 remaster. if you're interested in seeing what the new mass effect mod is like, check out the mod page.

### **Mass Effect 3 Mods Miranda**

this is an incredible mod that replicates the cutscenes from mass effect 2 to mass effect 3 for your enjoyment. this is a very early version of the mod, and there are still some bugs with the mod, but it's a very good start. the mod is hosted on nexus mods. the miranda episode gives us a few major improvements over the previous mod. first, we now get the option to

---

decide how much of the conversation you want to hear. prior to this, it was all or nothing. if you wanted to hear the conversation, then you had to hear it all. now, there's an option to pick and choose which parts you want to hear. this is a great improvement. we also get a few more scenes in the conversation with miranda. this mod is hosted on nexus mods. this is a mod that adds a new party member to the game. the character is adyas, who is a 'special agent' in the citadel security department. the mod works perfectly with the other mods and skins already available in the game, but it requires the character to be equipped with the shepard skin. the mod is hosted on nexus mods. the miranda companion appreciation mod unlocks

---

the companion app for miranda. this is a fun mod because you can use the app on all of your characters and still have the app unlock on miranda. the mod is hosted on nexus mods. mass effect 3 addresses this issue through the implementation of the player's journal. your journal is a chart that represents your character, and a small scroll at the bottom of the chart allows shepard to record his or her thoughts. shepard can use the journal to view his or her progress, and see the consequences of actions in the series. the journal is also important for keeping track of your options as shepard can often have a lot on his or her plate, and it's easy to forget what your decisions did or did not do.
