Professional color grading application with unmatched features. Audition Pro is the easiest way to color grade and optimize videos. Premiere Pro users benefit from full integration and performance boosts in a simple yet powerful interface. The redesigned user interface makes it easier than ever to choose the exact look for your videos, quickly and intuitively. Easily grade any aspect of a video, right from the clip and timeline windows and with comprehensive adjustments and powerful high-speed tools. While the majority of the movie making process is automated by today's digital video standards, there are still many manual tasks that need to be performed to ensure the best results from your video work. Fine-tuning color is one of those tasks and the Grib Color Grading Plug-in is designed to help you fine-tune video color more quickly and more accurately than ever before. Along with support for Premiere Pro and After Effects and the ability to grade both video and still images, the Grib Color Grading Plug-in provides a feature-rich color grading tool that allows you to perform a wide range of video grade operations easily and seamlessly. GRIB N-plus is the next generation feature-rich color management plug-in for Adobe Premiere Pro. GRIB N-plus provides the tools and

features to create a professional grade color grading look in about 15 minutes in Adobe Premiere Pro. It can also grade both still images and video, and support all the standard codecs plus AVCHD, 8K and all 4:4:4 codecs. This is the new version of the VIVO-MASTER DSP plug-in. The new VIVO-MASTER PRO DSP plug-in offers additional, unique features such as a new clippable still-frame option, selective control, global menu options, ability to preview metadata, and more. You'll also find a host of other new features and enhancements in this release.

Zen Animator is the industry-standard solution for creating stunning, polished, clean and efficient video effects and motion graphics for video, film and TV. Perfect for those who are new to time-lapse, video, and photo editing and for advanced users who want to polish up their existing tools. Zen Animator provides the tools you need to create your most impressive projects. The software supports everything from simple vector to raw frame-by-frame editing, and features 100 built-in presets that are a snap to edit with a single click. The dialog based editor which allows you to edit and preview individual layers of video. Starting with the dialog editor, Adobe has removed the need to edit your clips one by one or click on the preview window to see what your video looks like. With the new, easy to use dialog editor, clip selection is now quick and easy. You can even edit multiple clips at once. Automatically remove any unwanted elements like wires in your video with the GPU accelerated Remove Module. Works on any non-composite video, including protected Blu-ray discs. With just a few clicks, you can create custom masks, and even apply them

retroactively to your existing clips. Resize your mask to fit any aspect ratio with a single click. Even paste your mask into any other program. The Prisma FX Suite is an industry-leading collection of six unique filters that allow users to create numerous effects in seconds, a revolutionary method for creative enhancement of video, film, and photos. SmartSound ProStudio offers you an extensive range of plug-ins, sound design, and sound effects to create a professional soundscape for your project. This comprehensive library of tools and materials provides a truly unique sonic palette that allows you to create a variety of soundscapes for any imaginable project. SmartSound ProStudio comes with a collection of one-click sound-altering tools to easily create effects for your project, including: VolumeGator: A dynamic leveler designed to boost and lower the level of your audio without affecting loudness Bean-Fold: An ethereal audio flutter tool designed to create rarifying sounds Sync LFO: A simple tool for adding motion or vibrato to your audio Pan & Zoom: For audio effects such as morphing, panning, and zooming Morphing: For creating complex, morphing effects between 2 stereo waveforms Shift Level: For changing the tonality of your audio with just a click Unstitch: For

stitching a string of audio together into a perfect melodic range Percussion: For an exotic percussion effect Turbulence: For a brilliant detail filter that's ideal for processing guitar Room Stretch: For tone-shifting an entire room Room Size: For expanding or compressing a room Soft Snap: For adding a non-destructive snap to a loop SoundExchange: To replace any text on the screen with your own audio Sound Grab: To capture incoming audio Sound Mask: For removing sound from one track while allowing other tracks to be heard Play: For playing sound files Set: For building a loop or song Twirl: For creating a slight flutter 5ec8ef588b
