frie...

Tons of Decisions to Make! Investigate cities, find ruins, hunt monsters, perform rituals... there are many things you can and should do. The fates of characters in the game revolve around your decisions. And those decisions trickle down to other player's characters, which will happen as they wander through the map.

Individual goal and paths... as a party can't reach its goal without a single member, neither can you achieve your own individual goal! Many characters can proceed to the next map with multiple characters which are kept together in your inventory. The skills possessed by your party and your ability to influence the actions of other characters are all crucial factors in how the quest goes.

Playful Fantasy Adventure Without Any Formal Storytelling: The background story of the game is not depicted in any "official" ways, but it is presented to players through the memories and achievements of characters.

Spiritual Versus Game: The battle system and campaign system emphasizes showcasing your skills in the right way and allowing you to use your unique character with a minimal amount of controls.

Deep gameplay and high-refined graphics: A global grid map and different encounters. Unlike RPGs where characters fight, characters of the game mainly use their skills to ward off monsters. With a unique battle system, you will go through challenging boss battles. You can activate and manifest the skills of the various party members at any time.

We live in the most advanced communication system ever created. We are constantly engaged in acquiring data and information. We stream online content and play video games wherever, whenever, and however we want. Almost everything in our lives is connected to the Internet. This is true for our phones, our computers, and almost everything else that has the ability to access the web. But a complaint may arise if we start to have too much of a connection in our lives.
