Once in the app store, search for " APK Downloader for Android " and click the first result. This will download the APK file onto your desktop. Click file and rename the file in the download folder as 'AppName.apk' Click the 'Open' button. Click 'Install'. Once that is complete, once you are on the app, click the home button and search for the app name which you saved as follows: GameName.apk Click the app icon and once the game is open, click the back button to exit the game. If you need to exit the game to continue with what you were doing, you may need to simply close the app (by pressing the home button or 'close') instead of using the back button. Once that is done, click on the main menu and then click 'Settings' on the top left of the app. Scroll down to 'Google Drive' and click on 'Enable'. Go back to the folder where you saved the APK file in step 1, and open the APK file. Once opened, you can click the icon at the bottom to 'Decrypt' the app. Once decrypted, you should see a huge file. This will be the same name as the APK file except that it will have a little less letters. Once decrypted, this file is what you will use to install the game. Keep this file safe so it cannot be edited by an outsider. You can also copy it over to your phone if needed so you can easily navigate to it. Install the game from your computer on your phone. Restart your phone. Go to the main menu and select 'Games' Select the game 'AppName' and press 'Play' If you need to exit the game to continue with what you were doing, you may need to simply close the app (by pressing the home button or 'close') instead of using the back button.
