Basically there are two things I want to accomplish. I want to give the user to select the tax year from the first report and then I want to open the second report which is based on this tax year. I want to give the user to choose a country and then use this country as a filter to the parameter value. When I'm trying to pass this parameter from the first report to the second I'm getting the parameter without having the parameter value. When I'm trying to pass this parameter from the second report to the first it is working fine. A: I
