So, changing the Variable name to StringMetadataFilter fixed the problem [Effect of different doses of ionizing radiation on the concentration of calcium ions in blood of rabbits]. The results of the present study indicate that different doses of ionizing radiation (gamma, X and beta) decreased the number of the erythrocytes and increased the concentration of Ca²⁺ in the blood. The effect was a function of dose and time of exposure. The lowest concentration of Ca²⁺ in the blood was observed in animals exposed to 7.5 rad after 3 min. The results of the present study agree with that of other authors who reported an increase in the concentration of Ca²⁺ in the blood after exposure to gamma radiation. This suggests that the increase in the concentration of Ca²⁺ may be a significant indicator of the effect of ionizing radiation.
