Vcds Vag Com 1.91 Firmware

i have followed your post several times. i have installed windows 10 recently, and vcds is not compatible. i changed the settings in vcds and added microsoft wallet and my email but it doesn't work. (i don't know what the difference is, but i will try to contact you and bring the memory card with me so we can check the memory card and device to try another method.thank you for your help. but my question is that vcds v22.30 is the latest firmware, is there a new firmware out? i have seen the news. happy new year. i have upgraded to windows 10 and install vcds v22.30, but i can not use it, my vcds does not work. i have not used vcds before, i am a beginner. the first time i used it, is to check my filter and led and thermal module, and i can not use vcds at all. please help me. thank you. but the new version is not compatible with the hardware and software, i do not know why.i do not know how to configure vcds v22.30 hardware, i think the information that i sent you also some vcds v22.30, i am trying to solve this problem, but i cannot solve it. 1.you can download vcds-mode-setup-7.zip (when you are in vcds mode). 2.if you have unzipped it, insert a flash drive axxin: msp430 flash disk and press the start button; 3.the setup will start loading; once done, press the return button; 4.the vcds will be installed on your flash disk. after this, load the vcds.exe file on the flash drive you unzipped the file to. you may now connect your remote to the flashing microcontroller and the flashing microcontroller to your car. press the start button in the remote and it will search for the flashing microcontroller in the vcds firmware tree and then automatically recognize it if not changed. hold down the buttons in the remote to load vcds onto the flashing microcontroller.
